WPIL (Thailand) Co., Ltd.

Intelligent Pump Protection & Performance Monitoring System

The WPIL Pump Monitoring Unit is an advanced real-time monitoring and protection system designed for pump stations in irrigation, drainage, municipal water supply, and industrial applications. The system enhances operational reliability, improves energy efficiency, and enables predictive maintenance.

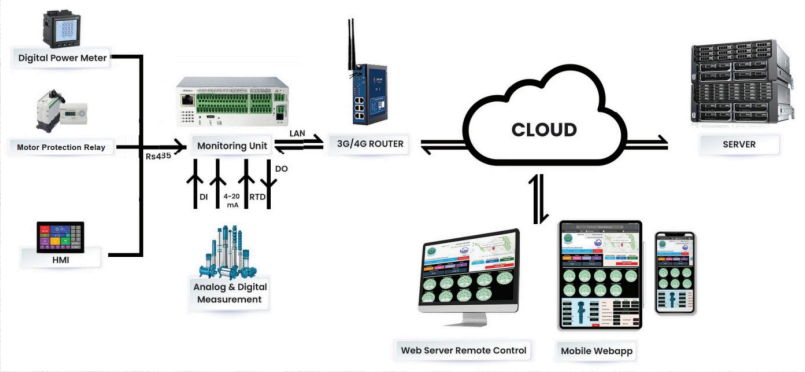

System Architecture

Instrument

- Pressure
- Flow
- Vibration
- Temperature
- Speed
- Level
- Electrical

Control & Communication

- Industrial PLC controller
- Data logger (USB / SD support)
- LAN / Wireless LAN
- Bluetooth
- 3G / 4G / 5G / IoT / LoRa
- RS485 Modbus protocol
- Cloud server integration
